

▪ Platform Services

DET's Platform Service builds on the Infrastructure Services to provide customers with environments where they can develop test and deploy customer-created or acquired applications. Currently, DET offers various Platform Services including database, web portal, web server etc. The Platform Services include software license management and essential professional services for the products included in the service.

| Service | Description |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Database Management | The Database Management solution provides a fully managed platform solution for use as an integral part of an overall customer application hosting environment. The offering provides scalable database services based upon performance, reliability and functionality needs. With the economies of scaled associated with a common, standardized solution, customers experience ease of management and cost savings. Database Software options include: Microsoft SQL Server, Oracle, and IBM DB2. |
| File and Print Services | The File and Print Services solution is provided to customers to store data in a secure, fully managed and maintained environment. Some examples of data that can be stored are Word files, spreadsheets, Power Point presentations, and other unstructured forms of data. |
| Web Hosting - Internet Information Server | IIS includes the framework for running asp.net applications in a secure environment. DET retains full control and responsibility for the acquisition, installation, configuration, administration, maintenance, and management of the server platform, IIS and operating system software installed on the DET managed infrastructure servers. |

| Service | Description |
